ACTIO CMS
DIGITIZE YOUR RECORDS & AUTOMATE YOUR WORKFLOW

We free you from the administrative hassles!

Actio Clinic Management System is designed to map out the workflow of a clinic, from appointment scheduling to patient registration, consultation, patient's history, dispensary, billing and payment collections.

When you set up patient's appointment, you will see the schedule of all the doctors at a glance so that you can set appointment to fit doctor's free slots. Upon patient's registration, the system will differentiate panel clients and walk-in patients and apply different charging and billing mechanism accordingly.

Y**ou will have at your fingertips all your patients' details and their past consultation and prescription histories** during consultation. The built-in Picture Gallery allows you to build your own repository of images, photos for your quick reference. The built-in Letter Writer let you create your own letter templates for quick letter issuance.

Inventory tracking is made easy with auto stock movement calculations.

Your cashier can generate cash bills, invoices, official receipts and track collections. You can easily check the latest status of your sales, your billing, collections and outstanding payments from panel clients or patients.

Actio CMS can be hosted on the Cloud or installed locally at your own premises. You can access to the system securely anywhere anytime.
